Exceeeeeeed THE POSSIBILITIES WITH MORE SPACE

With time, space has become a necessity rather than luxury. At home, every family member is unique and each of us has their own reason for needing extra space. It could be a professional needing the space for WFH, the studious kid hoping to solve Maths problems without disturbances, a meditation lover who would like a few moments of solitude or our guests from hometown might surprise us with a month-long plan to stay back. A 2 & 3 BHK at Estilo with more space gives you the freedom to live life without feeling the space crunch.

Architect's Note

Estilo is a project encompassing an array of exclusive features, designed with an idea of condensing the gap between the built and the greens. In response to the linearity of the site, the provided two towers are topped up by a rooftop garden, thus forming a monolithic structure.

In Estilo, every unit is designed to be outward-facing with openings planned to integrate ample light and ventilation. The bedrooms, provided with glass on one side, act as balconies in themselves.

The large windows and balconies provided with fins extruding from the structure form an aesthetically appealing structure.

The idea was to offer homes where you can find the best for all your needs and never have to compromise on living.

Landscape Architect's Note

The landscape design was imagined in a way that it complement the aesthetics of the structure. The landscape provided on the uppermost floor is divided into three parts - a landscape garden at the front end, a children's play area at the back, and a clubhouse and a gym in centre facing badminton court which is embellished by a swimming pool. This entire rooftop garden is confined by a skywalk / jogging track from where one can feel on top of world.

The spaces around the buildings are equally elegant. A variety of trees lined up add to the charm. Patches of greenery around the project elevates the beauty of Estilo and promises to uplift the mood of the residents.

RCC Consultant's Note

The structure is designed in a way that it ensures complete safety and stability. The design is capable of withstanding earthquake loads making it an earthquake-resistant structure. Our expertise and use of hi-tech tools have enabled us to build technically sound and efficient structure. The residents can enjoy complete peace of mind for life.

MEP Consultant's Note

Mechanical, electrical and plumbing networks have a huge role to play in a building's functionality and after collaborating with the architects and the engineers, we've ensured the best output. They are functionally top-notch and promise to be cost-efficient for residents.
